

**BLYTH TOWN COUNCIL**  
**Environment Committee**  
**Thursday 19 September 2024**  
**Decision Report**

**Recommendations Defibrillator Broadway Pavilion**

**The Committee RESOLVE to agree: To accept the defibrillator as an asset along with the management responsibilities and liabilities.**

Ward

Wensleydale

Risk Management

The ongoing costs would be met from budget code Environmental Services 700-771. The provision of defibrillators has previously been agreed as a service provision within other parts of the Town.

Objective

To provide a service that can be used which may assist the well being of both residents and visitors to the Town in advance of specialist health providers being in attendance.

Report

Blyth Town Council have been approached by the Northeast Ambulance Service and Northumberland County Council to take on the management of the defibrillator that is on the Broadway Pavilion. The system that is in place was donated by a resident from Blyth to NCC, and is the same model that we currently have in our other cabinets located around the Town.
